
**THE 3 MOST COMMON
COMPUTER FAILURES
CAN EASILY
BE PREVENTED.**

It's no secret that Florida is the lightning capital of the world, so prevent failure #1 with a proper UPS from Mr. Data to protect your investment.

Failure #2 is due to dirt, dust, animal hair, and moisture in the air. A simple cleaning by Mr. Data can prevent a system-wide crash, component burn-out, serious data loss, and hundreds of dollars in repairs.

Avoid Failure #3, Overheating, by adding additional cooling capacity inside or outside of the case.
